URA RINTARO

Full Stack Web Developer

@ urarintaro0@gmail.com   🔗 https://github.com/dreamDeveloper1203

SUMMARY

Full Stack Developer with over eight years of experience. Proficient in JavaScript and Python, who has extensive experience with technologies like React, Next.js, Vue, Node.js, and more. I have successfully developed numerous web apps for dynamic startups and established companies, including notable projects.

EDUCATION

M.S. in Computer Science

Kobe University

📅 2012 - 2016   📍 Kobe, Japan

EXPERIENCE

Senior Full stack Developer

Billboard JAPAN

📅 2021 - 2025   📍 Osaka, Japan

Billboard Japan is a sister organization of the U.S. - based music magazine billboard.

- Hired, trained and leading an Agile team of 6 full-stack developers.
- Created a full-stack web application using FastAPI (Python) for the back-end and Vue (JavaScript) for the front-end for a booking site.
- Built multiple web apps using combinations of React, React Native, Next.js, the MERN stack, and several different APIs.

Full Stack Developer

Next Inc

📅 2017 - 2021   📍 Tokyo, Japan

Based in Tokyo, Next Inc. provides integrated communication and advertising solutions.

- Built a full web application platform for an insurance brokerage startup from scratch.
- Created the architecture for the web application, including the database schema, authentication and authorization, front-end framework, and styling library, as well as supporting external APIs and tools.
- Built a public component library published on NPM to be used by external business partners.
- Designed and Developed UI design for over 15 clients using CSS, HTML, ASP.NET, Vue, and React

Full-stack Developer

The Venture Company

📅 2015 - 2017   📍 Tokyo, Japan

- Developed web-based software and websites for both academic and administrative staff, including many websites with custom CMS capability and major projects with custom web application capability.
- Created a custom web application for an external client using PHP and MySQL that allows users to enter Aboriginal language verbs and automatically conjugates them.
- Improved the financial report generation process by creating a self-service application using Linux, PHP, and MySQL.
- Delivered a full-stack web application using Django, MySQL, Bootstrap, and jQuery. The application contained a repository of thousands of documents about financial datasets.
